CCL STRESSOMATIC MKII 90 kN

CCL's new range of stressing jacks has been designed to increase efficiency and reduce the cost of stressing operations while delivering the highest levels of durability, safety and reliability.

Incorporating the CCL XL wedge, renowned for its world-class quality, the new jacks make wedge replacement quick and easy, and simplify maintenance procedures. The new ergonomic design makes the jacks easy to manoeuvre, while fewer parts and a refined manufacturing process have enabled CCL to offer a more cost-effective stressing option. CCL Stessomatic MKII jacks are designed and manufactured in the UK to the highest quality standards.

LATEST DEVELOPMENTS

- Fast and simple wedge replacement for quick changeover and easy maintenance.
- Uses CCL standard XL wedges.
- Competitively priced jack and spares.

OTHER FEATURES

- Hydraulic lock-off for safe, efficient wedge seating.
- Anti-roll mechanism prevents dangerous rotation of jack.
- Internal oil transfer to avoid external damage to the transfer mechanism.
- Remote stressing operation possible via pump hand control unit.
- Quick-release connections for screw-type couplings (optional).
- CE Marked.

SPECIFICATIONS 90 kN

Wedge	XL3	Min. Length of Wire/Strand	160 mm
Wire/Strand Dia.	3 - 9.6 mm	Max. Width	139 mm
Max. Design Load	82 kN	Distance From Bottom to Centre	50 mm
Max. Extension	400 mm	Overall Height	193 mm
Weight	19 kg	Dia. of Main Cylinder	65 mm
Length (fully retracted)	1163.5 mm
